

PUBLIC INFORMATION CENTRE 2
Sudbury Southwest By-Pass Four-laning
Highway 17, GWP 5825-05-00

Stantec Consulting Ltd. is carrying out a Planning, Preliminary Design, and Environmental Assessment Study for the four-laning of Highway 17 from Municipal Road 55 (middle junction), easterly to Highway 69 for 13.3 km. The purpose of this notice is to announce a second Public Information Centre (PIC) for this project.

The purpose of this Study is to identify a four-lane highway plan for the Sudbury Southwest By-Pass (Highway 17), with access restricted to interchange locations only. A four-lane controlled access highway will improve traffic safety and operations along this section of Highway 17.

Construction is not expected to begin for a number of years. This Study will develop a plan that will allow subsequent phases (detailed engineering and property acquisition) to proceed when four-laning is needed. Furthermore, development adjacent to the highway corridor can proceed without impacting the ministry's plan for future widening of the highway.

Alignment and municipal road connection alternatives were presented for public review at a Public Information Centre held on October 3, 2006. Following the PIC, and a preliminary evaluation, two project alternatives have been developed for further consideration. The purpose of this Public Information Centre is to display and seek input on the two alternatives for a four-lane Highway 17.

The Public Information Centre is scheduled for:

Thursday, March 8, 2007
At the Countryside Arena
235 Countryside Drive, Sudbury
4:00 PM to 8:00 PM

A third PIC is scheduled for late spring 2007 and will provide the public with an opportunity to comment on the preferred plan and preliminary design recommendations. A notice will be placed in the newspaper prior to the PIC.

This study is a "Group B" project under the Class Environmental Assessment (EA) for Provincial Transportation Facilities (2000). A Transportation Environmental Study Report (TESR) will be prepared and made available for public review at the conclusion of the study.

If you wish to comment on this project, have your name added to the project mailing list or have any questions regarding the study, please contact:
